

Remarks

The applicant has herein resolved an inconsistency in many of the claims concerning the "position indicated from the position transducer." As the position transducer is not a recited claim element, the amendments make the claims more definite.

All of the claims are clearly patentable over Kumar. As to claim 26, Kumar does not disclose any of the three claim elements, and so cannot be used to reject the claim.

If for any reason this Response is found to be incomplete, or if at any time it appears that a telephone conference with counsel would help advance prosecution, please telephone the undersigned in Westborough, Massachusetts, (508) 898-1501.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "B. M. Dingman", is written over a horizontal line.

Brian M. Dingman
